Dear Sir/Madam,

Subject: Disclosure under Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, We wish to inform you that Tembo Global Industries Limited **Enters Solar MEP Segment to Drive Sustainable Energy Solutions**. The same is for your information and record please.

Thanking You,

Yours faithfully,
For Tembo Global Industries Limited

Tembo Global Industries Ltd. Enters Solar MEP Segment to Drive Sustainable Energy Solutions

Mumbai: Tembo Global Industries Ltd., a prominent player in the industrial sector, is excited to announce its entry into the Solar Mechanical, Electrical, and Plumbing (MEP) segment. This strategic move will leverage the expertise of a newly assembled team of engineers, each with over a decade of experience in the field. Tembo Global Industries is set to begin procurement orders and participate in Power Purchase Agreement (PPA) tendering with various government organizations.

With a robust portfolio in engineering mechanics, design load calculations, and project execution across multiple sectors—including oil and gas, chemicals, construction, and HVAC—Tembo Global Industries is well-positioned to make significant contributions to the growing solar energy sector. The global solar energy market is projected to exceed \$300 billion by 2025, fueled by increasing demand for renewable energy and advancements in solar technology. In India, the solar energy market is rapidly expanding, with the country aiming for around 300 GW of solar capacity by 2030.

"The renewable energy sector is undergoing significant change, and we are excited to be part of this evolution," said **Mr. Sanjay Patel, Managing Director of Tembo Global Industries Ltd.** He added, "By entering the Solar MEP segment, we aim to enhance the efficiency and safety of solar installations while ensuring compliance with local codes and regulations. Our experienced team is prepared to meet the challenges of this dynamic market."

The Solar MEP segment encompasses essential components of solar energy systems, including structural design and electrical wiring. Effective MEP design optimizes energy production and minimizes risks associated with electrical and structural failures. As demand for solar installations continues to rise, driven by government incentives and decreasing technology costs, Tembo Global Industries is committed to providing cost-effective solutions that enhance accessibility to solar energy.

Tembo Global Industries is renowned for its export-oriented operations and holds the prestigious Star Export House certification. This new initiative reaffirms the company's dedication to innovation and sustainability, further solidifying its position in the industrial sector.
